ADS ClippySecurity System™ (KC216)

Portable Security System for Mobile Computers

The ADS ClippySecurity System will:

- provide access control to mobile computers
- secure your data in the event your computer is lost or stolen

1.2 million laptops were reported lost or stolen in 2006.

- Provides multi-factor security to prohibit growing theft of computer equipment and data.
- Enhances customer confidence around securing personal and financial data.
- Allows multiple users to access and share mobile computers yet still maintain a high level of security.
- Provides multi-factor security to eliminate liability with regard to data compromise in the event the mobile computer is lost or stolen.
- Assists with regulatory compliance, i.e., HIPAA, Sarbanes-Oxley Act, Gramm Leach Bliley Act.
- Compatible with the BeCrypt Encryption System for a complete laptop security solution.

Internal data security threats are no longer just an IT issue, but a business survival issue

The ADS ClippySecurity System™ Contains: (Model KC216)

- ADS Clippy USB Memory Key (16 MB)
- ADS Clippy Security System Software (on Device)
- ADS Clippy Security System Manual (on Device)

Technical Specifications

System Requirements

Operating System Requirements: Windows 2000 or XP
Ports: 1 USB Port
Disk Requirements: 15MB Free Space on C: Drive, CD Drive
Computer: IBM or Compatible
CPU: Pentium III or newer
RAM memory: 256 MB or greater

Clippy Hardware

Memory Technology: Solid State Flash Memory
Memory Size: 16 MB (64 MB, 256 MB 512 MB, 1 GB, 2 GB, 4 GB available)
Computer Interface: USB Port 1.0, 1.1, 2.0
Operating Current: Less than 50 mA
Suspend Current: Less than 300 uA
Data Retention: Over 10 years
Reading Speed: 1024 Kb per second
Writing Speed: 512 Kb per second
Operating Temperature: -40° F to 160°F
Storage Temperature: -58° F to 185°F
Relative Humidity under Operation: 5% to 94%
Relative Humidity under Storage: 2% to 96%
Vibration: Operating: 0.5 G 10-500 Hz, .5 Oct/min sweep rate Non Operating: 10.0 G 10-500 Hz, .5 Oct/min sweep rate
Shock: Operating: 0.5 G, 11 ms, Half-Sine
Dimensions: 2.77" x .83" x .54"
Weight: 7.37 g (with cap)
EMI Compliance: FCC (Class B), CE

The Way It Works

The ADS ClippySecurity System (KC216) Software is installed on the computer. The Clippy's are assigned to individual users and registered within the ADS ClippySecurity System software. When the computer is turned on, only a preauthorized Clippy, inserted into the USB port, enables the computer to boot and the user to access the computer. Removing the Clippy renders the computer inoperable. The system is locked, the keyboard and mouse cease to function and the monitor is blanked out.

As an added benefit, the Clippy device also serves as an external flash memory drive. The Clippy comes standard in the 16MB memory size and is available in various memory sizes from 64MB to 2GB of memory. The device is readable on the computer as any removable media. Software and data may be copied to the Clippy.

You may assign unlimited Clippy's to a computer and a Clippy can be authorized for unlimited computers. Although the ADS ClippySecurity System can be used with any Windows 2000 or XP computer, the ADS ClippySecurity System is ideally suited for portable computers and laptops. The ADS ClippySecurity System in conjunction with the BeCrypt Encryption System secures your laptop with the most secure, yet easy to use security system available.

Key Benefits

- Authorized Clippy determines workstation access.
- Computer automatically locks as user removes Clippy.
- Ease of computer security results in high user acceptance.
- Compatible with the BeCrypt Encryption system.
